A GUIDE TO... CLOUD BASED BACK OFFICE SOFTWARE

It's **very easy** to upgrade your **Gardiff EPOS system** with cloud based reporting software..

A quick call to Gardiff EPOS and your system could be up and running with seamless access to your vital business data via The Cloud in no time. Our solution downloads and stores your data in The Cloud so it is accessible to you anytime, anywhere.

It's really simple...

- 1** Contact Gardiff EPOS to request an upgrade to your existing EPOS system

- 2** Gardiff create your cloud account

- 3** Your data is imported in to the cloud

- 4** You create your bespoke reporting dashboard

- 5** Access your reports via smartphone, tablet or desktop

- 6** Analyse your reports whenever and wherever you want

The key benefits to your business...

Greater Control

- Powerful data about your business is at your fingertips, any time and anywhere.

Accuracy

- Error free recording of sales data allows you to make better, informed decisions about your business.

Remote Access

- Accessing your data in the cloud is via any internet connected device - you don't have to be on-site to monitor how things are progressing.

Managing Stock

- Track sales and trigger stock alerts or instantly re-order items when running low.

Frees You From Admin

- Once you've created your reporting dashboard you can quickly run your reports and analyse your data at the touch of a button - any time you like.

Consistency

- Human error is virtually eradicated so you know the data you get about your business is comprehensive and accurate.

Monitor Staff Performance

- Manage multiple operator profiles so you can see how staff are performing.

Identify Trends

- Identify your best sellers and ensure you never run out of stock.

Be in control of your business with a cloud based software solution - contact Gardiff EPOS **TODAY** on

TEN REASONS

why you should
upgrade your
EPOS system with a
cloud based
reporting software
solution **TODAY**

- 1 Create and customise your own bespoke data dashboard**
- 2 View live sales data, anytime, anywhere and in real time**
- 3 Historical data is accessible instantly**
- 4 Design and extract customised reports in Excel or PDF format**
- 5 Granular level reporting - drill down to single transaction**
- 6 Monitor your stock levels**
- 7 Manage your business from head office, group or site level**
- 8 Control promotional activity or loyalty schemes**
- 9 Individual employee tracking and reporting**
- 10 Helps identify and combat transaction fraud**

A Cloud based software solution working in tandem with your Gardiff EPOS system provides an indispensable tool for any size of business.

Whether you just require a single till in a single outlet or multiple tills across multiple outlets the cloud software collates, stores and reports with the same accuracy - and you have access to it whenever or wherever you like.

Your data is safe and secure in UK data centres. If your internet connection fails, your data is stored on your EPOS terminals and resynchronised once the connection is restored so you won't lose a single sale.
